DETAILED ACTION

1. The following is an examiner's statement of reasons for allowance: The prior shows a brush holding apparatus for at least one carbon brush having a support plate, a spring element, a commutator, a slip ring a retaining element, a base element and a brush guide. However, the prior art fails to show, in combination with the invention, a spring element constructed and arranged for urging a carbon brush having a longitudinal axis mounted in the brush guide in a direction towards a commutator or a slip ring and having a retaining element mounted to the base plate adjacent to the brush guide and having means for retaining the carbon brush in a retracted position against a force exerted by the spring element and the retaining element is movable between a first position in which the carbon brush may be retained by the retaining element and a second position in which the carbon brush may be released by the retaining element and additionally having a removable cover for the base plate including means to cause the retaining element to become disengaged from the carbon brush when the cover is mounted on the base plate and the retaining element having a first outer section that runs along a side wall that extends outwardly from a abase of the base plate and runs around its circumference with the first section crossing over into a center section that runs perpendicular to the first section from which the extension

extends and from which, on an opposite side, a second section extends, which fits into the guide which extends outwardly from the base.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
